SANDY CITY
APPROVED POSITION SPECIFICATIONS

I.   Position Title: City GIS Administrator   Revision Date: 09/13
                                                         EEO Category: Professional
                                                         Status: Exempt (Computer)
                                                         Control No: 30357

II. Summary Statement of Overall Purpose/Goal of Position:

     Under supervision of the Information Technology (IT) Director, develop and coordinate Sandy City's GIS
     activities. Integrate GIS activities with Sandy's Information Technology operational projects. Provide GIS
     programming, technical advice, training and other needed assistance to City departments and staff. Establish and
     implement standards and procedures for GIS maintenance and administration. Establish and maintain liaisons
     with relevant municipal, county, state and national GIS agencies.

III. Essential Duties:

     ● Act as project leader, technical advisor, and advocate to further develop and implement an integrated,
       agency-wide GIS.   Maintain extensive contact with other professionals within Sandy City.

     ● Provide all support services needed to maintain an effective agency-wide GIS.   These services may include:
       GIS data maintenance and quality control; hardware and software troubleshooting and upgrades; spatial and
       non-spatial database administration and enhancement; administering GIS-related software licenses and
       agreements; managing user logins; creation or integration of new data sources; and importing or converting
       various data in different formats or map projections.

     ● Provide, or work with staff in City departments to provide customized GIS application development. Assist
       in or directly accomplish the definition of requirements, design, programming, testing and implementation
       of GIS applications and spatial analyses. Help staff define their GIS needs and determine appropriate means
       to meet those needs.

     ● Set up systems and procedures to support on-going GIS projects, such as goals, policies, methods and
       standards for creation and quality control of new data and applications.

     ● Develop and implement an effective GIS training program for Sandy City staff at various levels of
       expertise. Educate staff and management on GIS capabilities and opportunities. Develop routine GIS
       production capabilities among staff throughout the City. Provide GIS user support through various means.

     ● Provide technical advice as required, and monitor the progress of Sandy City's GIS projects. Lead or serve
       on technical advisory committees, review consultant reports, assist in project scoping as needed for
       GIS-related projects.

     ● Work closely with IT GIS Analyst to coordinate work; help mentor and train the Analyst.

     ● Keep own GIS knowledge current through attending classes and other training that becomes available. Keep
       current with regional, state-wide and national GIS activities and organizations that impact Sandy City.
       Propose actions to keep Sandy City's GIS in step with evolving technology developments and best
       professional practices. Monitor and evaluate developments in the GIS field for potential application in
       Sandy City.   Organize and maintain a current inventory of relevant GIS projects and resources in the area.

IV. Marginal Duties:

     ● Provide graphic and illustrative assistance to City departments.
     ● Perform other duties as assigned.

V. <u>Qualifications</u>:
